PRANESH B

bpranesh594@gmail.com 9123586908 Coimbatore, TamilNadu Linkedin Github

PROFESSIONAL SUMMARY

AI and Full-Stack Developer with hands-on experience building applications using Python, Java, Spring Boot, React.js, and MySQL. Have worked with LLMs, RAG, Prompt Engineering, and AI-based applications through academic and personal projects. Strong understanding of OOP, DSA, DBMS, SQL, and REST APIs. Interested in building practical AI solutions and learning new AI and full-stack technologies.

EDUCATION

B.Tech in Artificial Intelligence and Data Science, *Rathinam Technical Campus* 2023 – Present
CGPA: 8.14 Coimbatore

Higher Secondary, *SRI.A Ramasamy Matric Higher Secondary School* 2023
Percentage: 84.67% Coimbatore

TECHNICAL SKILLS

Programming
Python, Java

AI & LLM
LLMs, Prompt Engineering, RAG, LangChain, LangGraph

Frontend
React.js, JavaScript, HTML, CSS

Backend
FastAPI, Spring Boot, REST APIs, JWT

Database
MySQL, SQL

Core Concepts
OOP, DSA, DBMS

Tools
Git, GitHub, Postman, VS Code

Automation & AI Tools
ChatGPT, GitHub Copilot, Claude, n8n, Cursor

PROJECTS

DeedCraft AI — Automated Legal Deed Generation
Tech Stack: Python | Open-Source LLMs | Semantic RAG
- Built an AI-powered legal deed generation system to automate verification of multi-decade parent deeds and Encumbrance Certificates, reducing manual document analysis.
- Engineered a semantic RAG pipeline using open-source LLMs, clause-aware document chunking, and a legal knowledge graph to retrieve and map ownership history and encumbrances.
- Reduced deed generation time from ~8 hours to under 3 minutes, achieving 98.2% extraction accuracy across 5+ records.

SpareHub – Peer-to-Peer Item Rental Platform
Tech Stack: Tech Stack: React.js | Spring Boot | Java | Python | FastAPI | MySQL | JWT | REST APIs
- Developed a full-stack peer-to-peer rental platform using React.js, Spring Boot, and MySQL for item listing, discovery, booking, and rental management.
- Implemented JWT authentication and role-based access control to secure user workflows and backend API access.
- Built REST APIs with Spring Boot for item CRUD operations, availability validation, booking, cancellation, and rental status tracking.
- Integrated a Python/FastAPI AI service with the Spring Boot backend to provide personalized item recommendations based on user preferences and rental activity.

INTERNSHIP EXPERIENCE

Web Development Intern, *InternBoot* 09/2025
- Developed responsive web pages and frontend features using HTML, CSS, and JavaScript.
- Used Git for version control and followed structured development practices.
